

To whom it may concern:

I, Jose A. Lozada, am writing to voice my concern about this legislation. H.B. 6355 does not allow the common person protect themselves or their families. As you know police cannot be everywhere all the time. Restricting someone ability because someone else feel they are a danger can lead to a slippery slope. Imagine someone doesn't like you because you didn't like their ideals. They go to the police and report you. Now your rights have been violated without you having committed a crime. I believe you should vote no on H.B. 6355. On H.B. 6491 give common people an alternative option to lethal force. This way the common person has an ability to defend themselves against criminals(who DO NOT FOLLOW theLAW). Please vote yes to H.B. 6491.
